## INTRODUCTION

The Uniform Crime Reporting Program Data, Police Employee Data, 1998 file contains monthly data on felonious or accidental killings and assaults upon United States law enforcement officers acting in the line of duty. The Federal Bureau of Investigation (FBI) assembled the data and processed them from UCR Master Police Employee (LEOKA) data tapes.

Each agency record included in the file includes the following summary variables: state code, population group code, geographic division, Metropolitan Statistical Area code, and agency name. These variables afford considerable flexibility in creating subsets or aggregations of the data.

## DATA COLLECTION DESCRIPTION

This dataset contains information collected through two UCR Program reporting forms: the annual "Law Enforcement Employees Report" and the monthly "Law Enforcement Officers Killed or Assaulted" (LEOKA) report. Together they represent the FBI's effort to produce a comprehensive dataset of assaults on police officers and, more generally, of "police strength" (the amount of resources devoted to policing as measured by the number of persons employed in law enforcement agencies).

The Law Enforcement Employees Report, a form sent to police agencies throughout the country by the FBI once a year, asked for a count of employees on the payroll of each agency as of October 31. The number of full-time law enforcement employees, officers and civilians, was requested by this form. Officers are defined as full-time, sworn personnel with full arrest powers including the chief, sheriff, or other head of the department. Persons performing guard or protection duties, such as school crossing guards, special officers, and merchant police, who were not paid from law enforcement funds were not included. Civilian employees include persons such as clerks, radio dispatchers, "meter maids," stenographers, mechanics, etc., who were full-time employees of the agency. Employees, both officers and civilians, who were on leave with pay also were included.

Information from the LEOKA report constitutes the second and largest portion of the dataset. For any month in which felonious or accidental killings and/or nonfatal assaults on law enforcement officers acting in the line of duty were reported on the UCR Return A form, a LEOKA form was to have been submitted to provide additional information regarding the attack. (See ICPSR 2904, UNIFORM CRIME REPORTING DATA [UNITED STATES]: OFFENSES KNOWN AND CLEARANCES BY ARREST, 1998 for a description of Return A). Monthly variables are coded zero for months in which no assaults occurred.

The LEOKA form gathered data on assaults that resulted in serious injury or in which a weapon was used that could have caused serious injury or death. Other assaults not resulting in injury were included, if they involved more than verbal abuse or minor resistance during the course of an arrest. Details are available on the number and type of patrols and shift assignments, the number of injury and non-injury assaults by type of weapon, and the number of weapon-specific assaults by situation type. These situations include disturbance calls, burglaries, robberies, other arrests attempted, civil disorders, custody of prisoners, suspicious persons, ambushes without warning, mentally deranged persons, traffic pursuits and stops, and all other circumstances. For each of these categories, the number of police assaults cleared by arrest (or other exceptional means) are also included. The final group of variables are assault counts by time of occurrence (in two-hour increments, e.g., the number of assaults occurring between 12:01am and 2:00am, 2:01am and 4:00am, and so on).

#### DATA COLLECTION PROCEDURES

UCR Program contributors compile and submit their crime data by one of two means: either directly to the FBI or through their state UCR Programs. State UCR programs frequently impose mandatory reporting requirements which have been effective in increasing both the number of reporting agencies as well as the number and accuracy of each participating agency's reports.

Further details regarding the Uniform Crime Reporting Program may be found in the following related publication:

Federal Bureau of Investigation. Uniform  
Crime Reporting Handbook. Washington, D.C.:  
U.S. Government Printing Office, 1984.

#### FILE STRUCTURE

The UNIFORM CRIME REPORTING PROGRAM DATA [UNITED STATES]:  
POLICE EMPLOYEE (LEOKA) DATA, 1998 is available from the ICPSR  
in single record per case format and has a logical record length  
(LRECL) of 3,460. There are 2,264 variables on 18,511 cases.

A raw character data file, machine-readable codebook, and SPSS and SAS data definition statements have been prepared for this collection.

#### ICPSR PROCESSING INFORMATION

The data collection was processed according to the standard ICPSR processing procedures. The data were checked for illegal or inconsistent code values which, when found, were recoded to missing data values. No consistency checks were performed.
